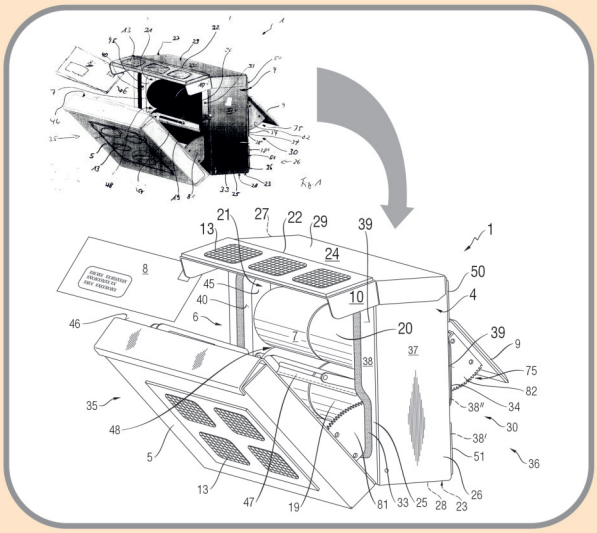
PatentPlan can obtain you patent drawings in accordance with patent regulations in Germany and internationally. We work efficiently, exactly according to your specifications and extremely reliably.

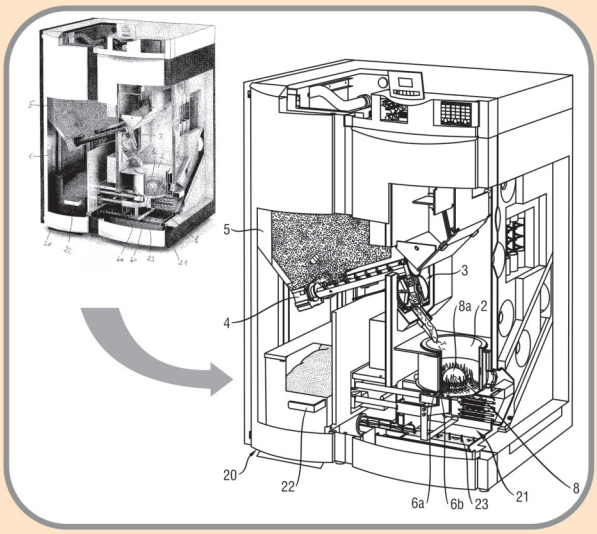
Initial priority application

If You want patent protection for a technical invention. You should enclose technical drawings with the initial priority application at the German Patent and Trademark Office (DPMA) or an international authority such as the European Patent Office (EPA). We create drawings according to international standards, which make a decisive contribution to the success of your initial registration.



Subsequent application

You have already submitted your initial priority patent application. Now it is of the outmost importance to subsequently submit patent drawings that meet all formal requirements. We have extensive experience in creating sponsorship drawings for successful subsequent applications. We would be happy to do this for you too.



Office Action

One or more patent drawings were rejected to by the patent office? We support you quickly and effectively in correcting and remedying formal deficiencies for you. This will give you the protection of your intellectual property you want after submitting it again.
